

COMMUNITY FOOD CO-OP STANDARDS FOR CBD SUPPLEMENTS

- Raw materials must be sourced from heirloom/agricultural hemp
- Vendor must provide information on where raw materials are sourced
- Raw materials must be tested along with finished product for: purity, potency, contaminants, adulteration, botanical identification, milligram amount per dose for both CBD and THC, and/or weight per dose of CBD and THC
- Vendor must be able to provide proof of third party testing, including frequency and consistency of testing, especially if there is a supplier change
- Product must have **FDA approved** Supplement Facts Label.
- The label must include: serving size, milligram amount of Cannabidiol (CBD) per serving, and list any other ingredients used. A listing of the total milligram amount of CBD in the product is not sufficient nor is listing the ingredient as Hemp Oil or Hemp Oil Extract.

* Aside from the specific reference to hemp or CBD, these are the same standards we use for any herbal supplement we carry.

COMMUNITY FOOD CO-OP STANDARDS FOR CBD TOPICALS

- Raw materials must be sourced from heirloom/agricultural hemp
- Vendor must provide information on where raw materials are sourced
- The label must include milligram amount of Cannabidiol (CBD) per container. If CBD is the main active ingredient, listing it as Hemp Oil or Hemp Oil Extract is not acceptable.
- Raw materials must be tested along with finished product for: purity, potency, contaminants, adulteration, botanical identification, milligram amount for both CBD and THC

COMMUNITY FOOD CO-OP STANDARDS FOR CBD GROCERY PRODUCTS

- Raw materials must be sourced from heirloom/agricultural hemp
- Vendor must provide information on where raw materials are sourced
- Raw materials must be tested along with finished product for: purity, potency, contaminants, adulteration, botanical identification, milligram amount per dose for both CBD and THC, and/or weight per dose of CBD and THC
- Vendor must be able to provide proof of third party testing, including frequency and consistency of testing, especially if there is a supplier change
- The label must include:
 - serving size
 - milligram amount of Cannabidiol (CBD) per serving
 - list any other ingredients used.

A listing of the total milligram amount of CBD in the product is not sufficient nor is listing the ingredient as Hemp Oil or Hemp Oil Extract.
